

Clear Creek Management Area
Comments on the Draft Environmental Impact Statement

Alternate E Vehicle Touring Non-Moterized

I prefer Alternate E because it permits limited, controlled access. The area would be available to the public in such a manner that the Bureau of Land Management would be able to closely monitor the participants.

BLM's Preferred Alternatives

I support the BLM's preferred alternative because they balance the need to protect the people from asbestos contamination, but still provide limited public access to the Serpentine area. The natural and cultural resources can only benefit from limiting human use in this area.
