Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that ANY vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

To help ensure that the EPA's acceptable asbestos risk levels are met for the Clear Creek Management Area, I'm writing to request that you please ensure the CCMA is kept closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use in the CCMA will cause acceptable levels to be exceeded. That means the CCMA is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Thank you for your time and consideration of this critical and sensitive matter

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

I'm writing to ask you to keep Clear Creek Management Area off-limits to vehicles. Traffic would kick up carcinogenic dust, and the EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Keeping the area clear of vehicles would also help ensure that threats to the area's rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

So please keep Clear Creek Management Area closed to vehicles. Thank you for your time.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

The Clear Creek Management Area currently restricts all vehicles due to the threat posed by asbestos that is unavoidably ejected into the atmosphere by their passing. Please retain this healthful prohibition. Keep the Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment demonstrates any vehicle use will exceed the EPA's acceptable asbestos risk levels. The ongoing vehicular moratorium has helped to ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, are substantially reduced; this is an encouraging development with regards to the vitality of these species.

Thank you for your time and consideration.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

If it's true that a Superfund designation was already waiting in the wings for this asbestos-dump at Clear Creek, why WOULDN'T you want to keep Clear Creek Management Area closed to vehicles? The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed acceptable asbestos risk levels. Clear Creek Management Area is no place for hot-rodding kids ? they clearly don't know what it means to kick up carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants - including the federally threatened San Benito evening primrose (primrose, by the way is a medicine, so we could do with allowing it to propagate) - will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust. And that includes dirt bikes, ATVs and other recreational vehicles. Keep them all out so they don;t track the asbestos even further!

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Cancer claims thousands of lives every year. Inhaling such carcinogenic dust would needlessly increase cancer risk and, undoubtedly, cancer deaths. As a cancer survivor myself, I do not wish to see more people fall victim when keeping off-road vehicles out of the Clear Creek Management Area can prevent exposure to such dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Why must All Terrain Vehicles and/or snowmobiles be discussed and brought up every year? The National Parks are considered a place to relax and get away from the noise, pollution and stress of everyday life. A place to walk and contemplate life's miracles as well as a place to see all the natural beauty and wildlife placed on this planet by our Creator. They are not a place to hear the whine of motors or smell the pollution and exhaust of any recreational vehicles including snowmobiles. It is time that the humans of this world start taking care of all the living animals and plants on the planet. If we do not start reversing the trend to annihilate every living creature other than ourselves we risk destroying the planet and the existence of all living creatures including ourselves. Enough is enough! Put all the riders in jail the minute they and their illegal vehicles cross onto any national park or roadless designated area. Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

There is no reason to open the door to such problems. How much less costly it is to prevent problems than it is to later attempt to alleviate the damage!

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust. This is a hazard to human health.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Thank you.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep the Clear Creek Management Area closed to vehicles. The Environmental Protection Agency's "Asbestos Exposure and Human Health Risk Assessment" indicates that any vehicle use in this area will exceed acceptable asbestos risk levels.

Continued closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Thanks for your attention to this important matter.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Putting the lives of plants and animals at risk, with some of these species being very rare, and threatening human health for something so frivolous as the entertainment benefit for a select group is not acceptable. This carries the potential for irreparable harm to rare, native species just trying to survive in their last few fragments of habitat, as well as great potential harm to others including innocent children brought along for the ride.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please re-open Clear Creek Management Area to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that vehicle use will not exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is the perfect place for vehicles ? carcinogenic dust problems in this area are shown to be a complete farce.

Re-opening this area to vehicles will also help ensure that the environmentally-responsible OHV users will continue to be able to work with the BLM to protect the area's handful of rare plants, including the San Benito evening primrose that all the pro-closure "environmentALists" are using as an excuse to try to keep public land locked away from public use.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

I urge you to keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is clearly not suitable for vehicles ? they kick up too much carcinogenic dust.

Keeping vehicles out will also protect the area's rare plants, such as the federally threatened San Benito evening primrose.

Thank you for considering my thoughts on this issue - Once again, please keep Clear Creek Management Area off limits to vehicles.

Grace Holden

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

I am writing to urge you to please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. No vehicles should therefore be allowed in Clear Creek Management Area, as they will stir up too much harmful dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Thank you for your time and consideration.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will cause airborne asbestos to exceed the EPA's acceptable risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust. Our healthcare system is already over burdened without more people developing easily preventable cancers and other illnesses from needless exposure as they "play in the dirt".

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced. We need these plants in their natural environment, doing what they do best in a site unsuitable for driving.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

California is a beautiful state with wonderful diversity of plants and animals!! I've visited many times and strong desire to have all critical areas kept clean and undisturbed from people and development. PLEASE let us as a nation keep it pristine and keep out any vehicle from Clear Creek Management Area!! Thank you!!

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

I am for the plants. I'm sure there are more appropriate venues for ORVs -- none actually occur to me except that they be NIMBY -- but to allow these smelly, polluting, asbestos-kicking machines to ride willy-nilly over delicate, rare, irreplaceable flora is simply unacceptable. It is also thoughtless, and is bad ecology. I hope you will attend more assiduously to the needs of Nature, than to the self-serving wants of ORV-ers. Furthermore, even though there is a terrible rift in our thinking that we humans are separate from the rest of "Nature" -- the effects of ORVs et. al. are bad for our own species as well.

Changing tone for a moment, from pompous to whiny -- let me point out to you that the loss of even ONE species is calamitous. It will not come back. And if such an extinction were to be caused by neglecting to prohibit off-road vehicles from roaring through the species' unique and only environment -- would you feel ok with that?

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Imagine visitors to the area being enjoy the quiet beauty of the area without seeing it criss-crossed with tire treads and without inhaling massive amounts of carcinogens. When the ORV cowboys are older and wiser, they will thank you.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Having enjoyed many years of off-road motorcycle riding, I would rather not ride in areas where asbestos dust would be kicked up and breathed by people and animals alike. Please close such areas to vehicles that the resident plants may survive and both humans and resident animals can be healthy.

Thank you for your consideration.

Subject Keep Clear Creek Management Area Closed to Vehicles

This seems like a no brainer ~ human health & safety and the preservation of our planet vs. thrills obtained on ORVs that could be using private property elsewhere. Do the right thing and protect people and the environment.

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

I am a voting US citizen from San Jose, CA (835 Pinewood Dr. 95129) living in Canada. I am very concerned that the Bureau of Land Management is planning to open an area to motorized vehicles that should be closed. Is political pressure from ATV owners more important than human health and the health of our environment? The answer needs to be a clear NO.

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

I am writing today to urge you to keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust. That isn't healthy for the environment or the people involved.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced. It can only be a lose-lose situation if vehicles are allowed back into the area.

Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Every day you see TV ads by lawyers saying industry has injured and killed people with its use of asbestos. If you open this area to motor vehicle usage you can bring on billions of dollars in law suites against the Federal Government. Do you really want to open this can of worms? Anyone responsible for this action could be considered a co defendant in future legal actions as they are well aware of the human health hazards.

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

As a farm forester i know first hand the damage riders of Off Road Vehicles (ORV) can do to land, trees and plants and how difficult they are to control. You definitely did the right thing by closing the Clear Creek Management Area a few years ago and it should be kept closed to protect these public lands from further abuse. How much abuse does a piece of public land and the habitat it provides have to endure before we protect it for the public. The fact that the ORV use also stirs up high levels of asbestos clearly dictates the area remain closed to protect humans as well. As you know, the EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Therefore, the Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

In addition, maintaining the closure to vehicles will help ensure that rare plants such as the federally threatened San Benito evening primrose, are protected from damage by ORV riders. For that reason I request that the area remain closed to vehicles. Thank you for accepting my comments and please keep me informed of your decisions regarding this important issue.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels, and found that airborne concentration of asbestos was directly related to soil disturbance activities; that children were exposed to higher asbestos levels, and were more affected by the exposure, than were adults; that activities with the highest exposure -- motorcycling, A.T.V. riding, and S.U.V. operation-- had the highest corresponding excess lifetime cancer risk; and that reducing exposure would reduce the risk of developing asbestos-related cancers and of debilitating and potentially fatal diseases.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Isn't it really time for the bureaucrats managing public lands (e.g. you) to stand up to the destructive "off road vehicle" lobby? Why do they receive special rights to permanently destroy public lands while uses such as camping, hiking, birding, and even grazing ensure real use for future generations? Are you TH AT beholden to Toyota, Honda or whatever other companies manufacture the vehicles and fund the lobby? Are you THAT afraid to stand up for what would be professional management? Let the lobby build sand dunes and wild race tracks on abandoned suburban developments or empty shopping mall parking lots. No harm, no foul.

Stop this!

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Also any humans or animals living in this area can look forward to getting cancer or some other horrific disease due to this high volume of asbestos dust. America is removing asbestos from all school rooms and housing and now we need to remove the asbestos from our environmental heritage. People can learn to hike again; it's not contagious or carcinogenic activity. And hiking people might appreciate our American heritage more as they will be able to smell and hear it and see our wildlife up close.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

I'm very concerned about keeping Clear Creek Management Area closed to vehicles. The Environmental Protection Agency has declared that any vehicle use will put too much asbestos into the air to be safe.

We need to do everything we can to minimize the health risk of human hazards but also the delicate and irreplaceable habitat that surrounds the area.

Please keep the area closed to vehicles. Let's do all we can to protect these precious places left in our nation.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

Subject Keep Clear Creek Management Area Closed to Vehicles

Quite frankly, it would be the height of stupidity to reopen the Clear Creek Management Area due to the amount of asbestos dust that they stir up. With the issues we currently have with health care, do you really want to add more burdens to the system when the people who live around the area and those who would be foolish enough to go ORVing there come down with lung cancer? Please keep Clear Creek Management Area closed to vehicles. The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.

The EPA's Asbestos Exposure and Human Health Risk Assessment shows that any vehicle use will exceed the EPA's acceptable asbestos risk levels. Clear Creek Management Area is no place for vehicles ? they simply kick up too much carcinogenic dust.

Maintaining a closure to vehicles will also help ensure that threats to the area's suite of rare plants, including the federally threatened San Benito evening primrose, will be substantially reduced.
