Subject Additional Questions/Request

A few things I forgot to ask last night:

How much did the BLM spend to build the Jade Mill campground, roughly, in the thousands of dollars.

On what date did the EPA first give the BLM a draft copy of the final report that was released on May 1, 2008. How many draft copies/revisions did they provide?

Could the results of the air sampling that was done over the years during the three enduros be made available via this request or do we need to FOIA them?

Last night Tim Moore said that he knew the location of the jadeite formation located in Clear Creek canyon. Would you please have him provide either a map of the location or the map coordinates so I can locate myself on a map.

Can you provide the name, phone number and e-mail address of the EPA employee who reanalyzed the risk assessments based on the scenarios that were described in the DEIS.

On what road and at what date and time of day was the EPA picture showing the two quads in a cloud of dust taken. When was this road last graded prior to the date of the picture?

It was mentioned that there would be another meeting in February but I missed who was being invited, government entities or businesses?

Thanks

Ed Tobin
