RE: CCMA RMP / EIS

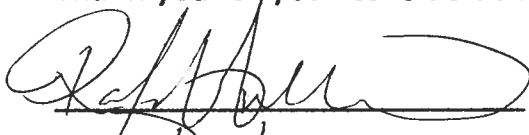

Dear BLM,

This letter is being written to voice my displeasure to the draft of the RMP/EIS that was released by your office in December of 2009. It is my opinion that the CCMA should be open to any and all vehicle traffic. The public has been warned of the risks of natural asbestos the EPA claims to exist in that environment for over three decades and still the public chooses to recreate there. It is not the place of any government agency to attempt to make any choices on my behalf in regards to my medical health or safety. It also has not been scientifically and medically proven beyond a shadow of a doubt that the type of naturally occurring asbestos found in the CCMA actually poses the same kind of risks as chemically treated manufactured asbestos has caused in humans. Never the less, we still choose to recreate there.

The off road community has put countless effort into maintaining the trails and camp grounds in and around the CCMA. Our Green sticker funds and our gate admissions money has paid to maintain and keep open these lands that are owned by US, the American People. We also pay our income tax that pays BLM employees salaries. The public has paid enough. Now let us back on our land!

We Demand the CCMA be opened to the public for immediate year around motorized vehicle access, and this RMP/EIS be scrapped.

Thank you for your consideration on this matter,

The off road community has put countless effort into maintaining the trails and camp grounds in and around the CCMA. Our Green sticker funds and our gate admissions money has paid to maintain and keep open these lands that are owned by US, the American People. We also pay our income tax that pays BLM employees salaries. The public has paid enough. Now let us back on our land!

We Demand the CCMA be opened to the public for immediate year around motorized vehicle access, and this RMP/EIS be scrapped.

Thank you for your consideration on this matter,

RE: CCMA RMP / EIS

Dear BLM,

This letter is being written to voice my displeasure to the draft of the RMP/EIS that was released by your office in December of 2009. It is my opinion that the CCMA should be open to any and all vehicle traffic. The public has been warned of the risks of natural asbestos the EPA claims to exist in that environment for over three decades and still the public chooses to recreate there. It is not the place of any government agency to attempt to make any choices on my behalf in regards to my medical health or safety. It also has not been scientifically and medically proven beyond a shadow of a doubt that the type of naturally occurring asbestos found in the CCMA actually poses the same kind of risks as chemically treated manufactured asbestos has caused in humans. Never the less, we still choose to recreate there.

The off road community has put countless effort into maintaining the trails and camp grounds in and around the CCMA. Our Green sticker funds and our gate admissions money has paid to maintain and keep open these lands that are owned by US, the American People. We also pay our income tax that pays BLM employees salaries. The public has paid enough. Now let us back on our land!

We Demand the CCMA be opened to the public for immediate year around motorized vehicle access, and this RMP/EIS be scrapped.

Thank you for your consideration on this matter,
